EDUCATION

Noida Institute of Engineering & Technology (NIET), Greater Noida

Oct 2023 - June 2027

BTech In Information Technology | CGPA: 7.9

TECHNICAL SKILLS

Programming: C,C++, JavaScript

Frontend: HTML, CSS, React.js, Redux Toolkit, Tailwind CSS

Backend : Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Databases: MongoDB, Redis, MySQL, ChromaDB

AI Technologies: AI Agents, Vector Embeddings, LangChain, LangGraph, RAG, LLMs

Developer Tools: Git, GitHub, Postman, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS

PROJECTS

AI Interview Agent — MERN | LangChain | LangGraph | RAG | Vector Embeddings | LLMs

- **Developed an AI-powered interview platform** using the **MERN stack and LLMs** with resume-based question generation, automated candidate evaluation, and support for **500+ mock interview sessions**.
- **Engineered a Retrieval-Augmented Generation (RAG) pipeline** using vector embeddings, semantic search, and cosine similarity, processing **1,000+ resume chunks** to generate context-aware interview questions with improved relevance.
- **Architected a Multi-Agent AI Workflow** comprising Resume Analyzer, Question Generator, Interview Evaluator, and Feedback Agents, reducing manual assessment effort by **~70%** and improving evaluation consistency.
- **Implemented secure and scalable authentication** using **JWT, Redis token management**, and role-based access control (RBAC), enhancing application security and session reliability.
- Optimized backend performance using **MongoDB indexing**, caching, asynchronous **AI processing**, and efficient REST API design, **reducing response latency by ~30%**.

SnackNow — MERN | Socket.IO | Redis | Razorpay | Generative AI

- **Developed an AI-powered Street Food Delivery Platform** with vendor management, real-time order tracking, secure online payments, and location-based food discovery.
- Designed scalable **RESTful APIs** and an event-driven architecture using **Socket.IO**, enabling low-latency real-time rider tracking and live order status updates.
- Integrated 8 AI-powered features including **Food Recommendations**, Semantic Search, **AI Chatbots**, Menu Generation, demand prediction, review summarization, image analysis, and natural language ordering using Google Gemini API.
- Implemented secure authentication and payment workflows using **JWT, Redis Token Blocklisting**, Razorpay, and **Role-Based Access Control (RBAC)**, ensuring secure user sessions and transactions.

ACHIEVEMENTS

- Solved **600+ DSA problems** across LeetCode and GeeksforGeeks.
- Achieved a **5★ C++ rating** on HackerRank.
- Winner — GeeksforGeeks **Backpack Challenge**.
- Earned **15+ LeetCode badges** through consistent problem solving and participation.

CERTIFICATIONS

- **Design Thinking for Innovation** — Infosys Springboard
- **Programming in C** — Infosys Springboard
- **Core Computer Science Subject for Interview Preparation** — GeeksForGeeks
- **Introduction to Cybersecurity** — Cisco Networking
